

DP.D.3. Genetically altered animals - use in procedures

Data inclusion criteria

Report year: 2015 (APPROVED)

Country: Denmark

EU Submission: ALL

Re-use: ALL

Genetic status: ALL

Animal Species: ALL

Species grouping Level 1: ALL

Species grouping Level 2: ALL

Mammals: ALL

Non-human primates: ALL

Submission Id: ALL

Id 1: ALL

Id 2: ALL

Id 3: ALL

Narrative

This report shows the number of uses of animals with a genetic alteration (GA), broken down by whether the animal exhibited a harmful phenotype at the time of the study or not.

It also shows the high-level purposes for which genetically altered animals have been used.

It shows both the first and all the subsequent uses of the animals completed in the reporting period (unless either option is specifically excluded in the data filtering criteria when selecting the report).

The Data Provider reports allow the creation of standard (public) reports

- before the reports are available for the general public (i.e. non-published data), and
- including information on non-EU submissions (as a default) i.e. Member State specific national data e.g. on animals killed for tissue/organs – unless specifically excluded in the data filtering criteria when selecting the report.

Data filtering criteria has been complemented with an option to filter data into the report also at the level of species groupings.

It should be remembered that by including one data filtering criterion, all others from that selection type are by default excluded. For example: if selecting "mouse" as the animal species, the data on the report will only show the results containing mice. However, if at the same time an incompatible selection is made e.g. selecting species grouping level 2 "birds" (excluding all other groups of species covering also "mammals" (including "mouse")), no data is shown in the report, as the two selections are incompatible.

DP.D.3. Genetically altered animals - use in procedures

Genetic Status	Number of Animals
Genetically altered without a harmful phenotype	25,808
Genetically altered with a harmful phenotype	13,005
Total	38,813

Genetic Status

	Genetically altered without a harmful phenotype	Genetically altered with a harmful phenotype	Total
Basic Research	14,964	1,195	16,159
Translational and applied research	10,679	11,810	22,489
Regulatory use and Routine production	165		165
Protection of the natural environment in the interests of the health or welfare of human beings or animals			
Preservation of species			
Higher education or training for the acquisition, maintenance or improvement of vocational skills			
Forensic enquiries			
Non-EU Purpose			
Total	25,808	13,005	38,813
